ORGANIZATIONAL OVERVIEW

OVERVIEW OF FISCAL YEAR 1987

The Utah State Tax Commission is a constitutional body composed of four commissioners appointed by the governor with the consent of the Utah State Senate. The governor designates one of the four commissioners as chairman. Commission terms are set by statute for four years with one term expiring each year. The commissioners appoint an executive director in consultation with the governor and with the consent of the Utah State Senate.

The Tax Commission's primary responsibility is the administration and supervision of Utah's tax laws. Through the executive director, the commission administers a department of over 700 staff organized in seven divisions. The commissioners set policy and promulgate rules to guide the staff in interpreting and carrying out the state's tax laws.

The commission also functions as the State Board of Equalization to equalize real and personal property valuations. The board may issue orders to correct valuations on properties that have been improperly assessed. They also hear appeals from decisions of county boards of equalization. In addition, the commissioners perform quasi-judicial functions in hearing formal and informal appeals concerning centrally assessed properties, requests for waiver of penalty and interest, and sales tax license revocations.

The Appeals Section completed a procedures manual for county boards of equalization. The Appeals Section has seen a ten percent increase in cases received, but was able to reduce staff by one individual through automation.

During the previous two fiscal years, the Tax Commission made a commitment to improve the processing of revenue collection, better serve the taxpayer, and contain operating costs. A number of changes during the past fiscal year contributed to success in meeting these goals.

Administration

The consolidation and improvement of administrative functions continued during FY 1987. Personnel functions and budgeting were centralized. An employee training and continuing education program was initiated to improve the management skills and technical expertise of employees. A number of special research projects were completed in areas such as space utilization, tax amnesty, and a sales tax distribution fee.

The executive director initiated reorganizations in the following divisions to maximize cost containment measures: Operations, Motor Vehicle, Property Tax, and Motor Vehicle Business Administration.

Auditing

The Auditing Division surpassed the goals set for FY 1987. Total assessments increased from \$38.3 million to \$59.8 million: this is \$12.8 million more than the goal and represents a 56 percent increase. Total employees increased only 20 percent. Other achievements include the following:

- The return on each dollar spent increased from \$8.77 to \$12.70, exceeding the national average of \$7.00.
- The Oil and Gas Section increased audit assessments from \$2.7 million to \$9.8 million, a 263 percent increase.
- The Field Section increased audit assessments from \$15.8 million to \$26.6 million, a 68 percent increase.
- Corporation franchise tax assessments were \$16.7 million, more than one-fourth of this year's tax amount, indicating poor compliance.
- Sales tax coverage approached two percent, the coverage recommended by the Office of the Legislative Auditor. Audits increased from 389 to 853, a 119 percent increase.

Other accomplishments include the hiring and training of 18 new auditors. The minerals program completed its first audit cycle of all taxpayers. The two auditors in the program made assessments of nearly \$3.3 million. The division aggressively pursued "gray" areas of the law through audits or through administrative resolutions. The division has also created a Problem Resolution Group to better assist taxpayers with questions and problems.

Data Processing

The Tax Commission is heavily dependent on automated systems. New systems being implemented include sales tax distribution, document control systems, revenue ledgers, a motor vehicle cashing system, sales ratio support, appeals system, audit activity reporting system, and a personnel system interface.

The aggressive cost containment policy has dramatically reduced the rate of growth in the data processing budget without reducing services or sacrificing key initiatives.

Operations

The Operations Division has continued to enhance its efficiency through automation. Four Rapid Extraction Desks for incoming mail allows each operator to double the amount of mail processed per person. New microfilm cameras allow filming with an expended image mark which reduces retrieval time, improves accuracy, and gives a sharper image. Four new plain paper microfilm reader/printers reduce the cost of making copies, improve the quality of copies, and minimize the retrieval time. Savings may exceed \$100,000 in FY 1988 with the addition of three more reader/printers. New automated files for tax returns were installed. The new files add to the safety for the operator and provide easier and quicker access to returns. All of this new equipment also allowed for the reallocation of personnel to other critical areas in the division.

The collection of dollars from delinquent accounts increased 50 percent to \$26.5 million. The collection of current taxes owed by delinquent taxpayers increased 41 percent to \$27.7 million. Other achievements include the following:

- The \$670 assessed per audit hour was a 25 percent increase.
- Audit assessments increased 47 percent to \$2.4 million.
- The 1,150 audits of special events represented a 40 percent increase.
- The legal section filed nearly \$12 million in claims, a 65 percent increase.
- \$4.5 million was collected on bankruptcy accounts.
- Personal assessments doubled to \$2 million.

Property Tax

The Property Tax Division implemented the automation of centrally assessed property and the assessment/sales ratio study. The centrally assessed system allows the division to meet statutory reporting requirements and improve assessment accuracy. The system also provides savings in personnel and current expense.

Changes in statistical methodology and development of assessment level performance standards resulted in fewer appeals. In 1986 five counties appealed, compared to over 15 appeals in 1984.

A market study was performed in personal property which served as the basis for updating the personal property valuation schedules. These schedules serve as recommended guidelines for county assessors. The schedules had not been reviewed or updated for many years prior to the study. The Property Tax Division is continuing to address concerns of the construction industry regarding the schedules used to value construction machinery and equipment.

Motor Vehicle

The Motor Vehicle Division also relies on equipment and automated data processing to achieve better customer service while containing costs. The new cashing system was installed, tested, and fully implemented in the Salt Lake City and Farmington offices. Installation of the new system is continuing in the other offices. The system will provide uniform service throughout the state with better accounting of transactions.

Several "firsts" were accomplished during FY 1987. The division completed audits of 28,000 randomly-selected individuals under direction of legislation aimed at identifying uninsured motorists. The division received an excellent audit report in its first federal audit of the Highway Use Taxes collection procedures. The division developed and implemented a system of airplane registration for the 2,200 resident airplanes. Legislation requiring titling of off-highway vehicles was also implemented.

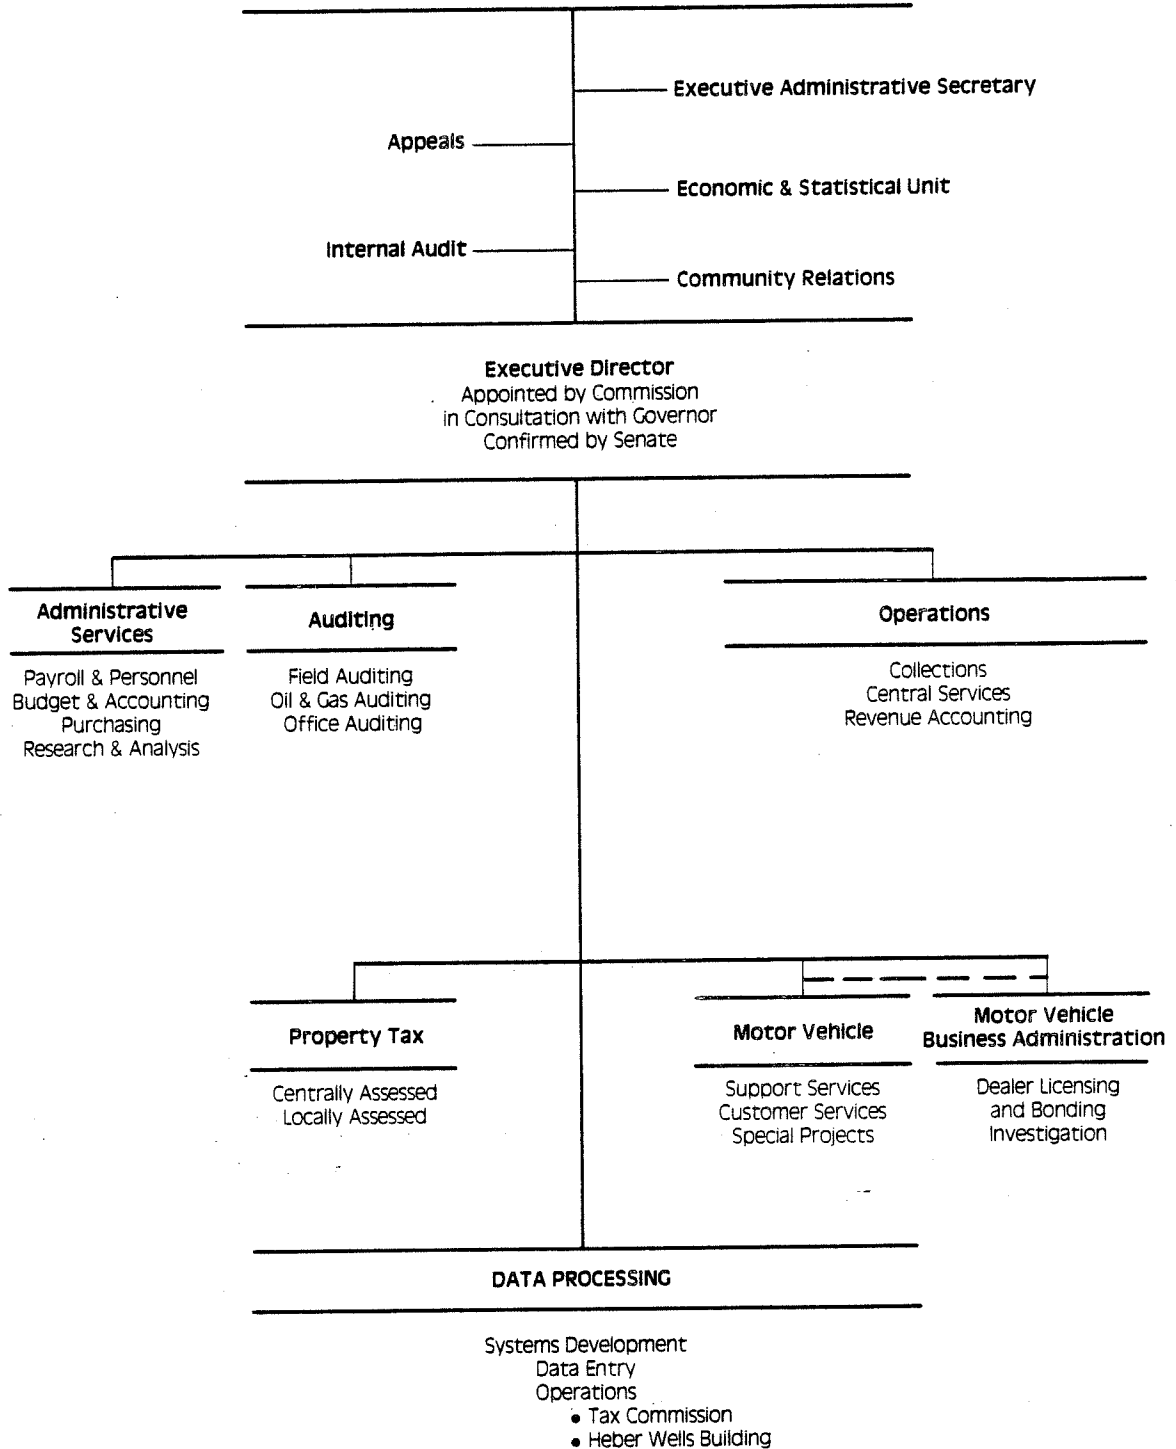

The division conducted a comprehensive study of its branch office locations, and through the cost-accounting system, analyzed the associated costs of doing business in each location. The study indicated that certain state-mandated services can be more efficiently delivered by local government. The division adopted a regionalization plan to contract with county assessors to provide basic motor vehicle services; to increase fees associated with transactions performed by the counties; and, in regional offices, to provide special services to customers and support to county offices.

Motor Vehicle Business Administration

Complaints filed by car buyers against dealers for "failure to deliver title" account for 41 percent of the Motor Vehicle Business Administration (MVBA) caseload. The division has automated the office and reallocated human resources to improve services to the motoring public and automotive businesses. Achievements during the fiscal year include the following:

- The 1,056 cases investigated represent a 41 percent increase over the previous fiscal year.
- Criminal counts filed increased 132 percent from 105 in FY 1986 to 244 in FY 1987.
- The division initiated a new program of filing civil actions to help victims of motor vehicle fraud recover some of their losses. One investigator's case will probably recover titles valued at over \$200,000. Another case consists of 135 counts with an estimated potential loss for victims of \$275,000. Cases are coordinated with the Office of Attorney General and the Division of Consumer Protection.

OVERVIEW OF COLLECTION AND DISTRIBUTION OF REVENUE

OVERVIEW OF COLLECTION AND DISTRIBUTION OF REVENUE

Summaries of historical data are useful in estimating future revenues and analyzing impacts of past legislation, as well as being indicative of how the economy fared. Figure 1 in this section shows the distribution of state revenues among the major funds. Table 1 compares major sources of revenue collected by the Tax Commission for the past ten years. Figure 2 charts the percentage of revenues collected by major funds from each tax source. Individual income, sales and use, and motor fuel taxes dominate the four major funds. Table 2 separates gross from net collections, identifying refunds and adjustments. Refunds are a major factor in estimating the individual and corporate income (franchise) taxes. Finally, Table 3 lists Utah population by county in order to assist researchers in computing per capita tax collection data.

REPORT OF THE ECONOMIC AND STATISTICAL UNIT

REPORT OF THE ECONOMIC AND STATISTICAL UNIT

The Economic and Statistical Unit of the Tax Commission compiles and publishes statistical reports reflecting the status and history of tax revenues in Utah as well as projecting future tax revenues based on economic models and computer simulations. These reports are prepared and published under the general powers and duties granted to the Tax Commission by the Legislature to provide information that will assist efforts to equalize the burden of taxation in the state.¹

Several major research reports were published in fiscal year 1986-87. The first of these reports, Broadening the Base: An Evaluation of a Sales Tax on Services, explores the issue of expanding the sales tax base to include services. The second study, Inflation and State Income Tax Reform, discusses important changes that were made in the Utah state individual income tax law during the 1987 session of the legislature. A third study entitled, Utah Statistics of Income, Return Year 1985, compiles data from IRS records of taxpayers with Utah addresses who filed 1985 federal tax returns (refer to individual income tax section). Our fourth publication, Utah Mineral Production Withholding Tax Return Year 1985, analyzes withholding from mineral production royalty recipients for return year 1985. This report compares return year 1985 with return year 1983 and breaks down withholding by type of mineral, type of recipient and location of recipient.

Copies of the aforementioned reports are available from the Economic and Statistical Unit, Utah State Tax Commission, Heber M. Wells Building, 160 East Third South, Salt Lake City, Utah 84134.

Editor's Note:

The format of the Annual Report of the Utah State Tax Commission 1986 - 1987 is similar to that used in past years. The sequence in which the taxes are presented has been altered somewhat, reflecting the shift in revenues generated by specific taxes.

The 1987 Utah State Legislature approved legislation which clarified and recodified many state tax statutes. The code citations in the Annual Report reflect the new numbering as a result of recodification. A listing of previous and new citations are included in the publication listed below.

Another significant change is the absence of references to Tax Commission Administrative Rules in the Annual Report. During 1987, the Administrative Rules of the Commission were drastically edited and reorganized. Because of the nature of these changes, it was not possible to isolate the specific changes made to a particular rule during the course of the year.

All Tax Commission Administrative Rules, as well as the Utah tax laws, are in a separate publication, Utah Tax Statutes and Administrative Rules of the Utah State Tax Commission, available for \$15 from Code Co Law Publishers, P.O. Box 1471, Provo, Utah, 84603. The administrative rules updates made in the 1987 and the legislative changes of 1988 will be printed in July, 1988.

PROPERTY TAX

PROPERTY TAX

During 1987 the Property Tax Division reorganized its resources creating two primary sections--local services and centrally assessed property. The division has restated its mission as follows: to insure that property assessment and taxation is accurately and equitably administered throughout the state through management of a locally administered, Tax Commission-directed, property tax system. A new standards and training section was created. The technical assistance section will place more emphasis on assistance that increases a county's capability to administer programs at the local level. Resources were shifted to the centrally assessed section to enhance audit programs.

Major recodification legislation was passed in 1987, resulting in several significant changes in division responsibilities. For example, the assessments of water companies and non-operating properties of public utilities were shifted to the county assessor.

Machinery and equipment used exclusively for agricultural purposes were exempted resulting in a loss of approximately \$1,750,000 in property tax revenues.

A statewide levy to cover the costs of assessing and collecting property taxes was implemented in 1987. The levy is calculated by the Tax Commission based on costs certified by the State Auditor and is limited to .05% of taxable value. The maximum rate may be exceeded for costs associated with reappraisal or legislative, judicial or administrative orders.

The tax base of utility assessments will increase dramatically in 1988 when the Intermountain Power Project becomes fully taxable. Currently, only the Uniform School levy, the local option levy, the statewide levy for assessing and collection property taxes and the levy for the Delta Sutherland Oasis Cemetery Maintenance District are applied against the value of the project. Other taxing entities have been receiving impact alleviation payments in lieu of property taxes.

The former statutes calling for valuation of patented claims at \$50 per acre, and the assessment of metalliferous mines on net proceeds have been repealed effective January 1, 1988.

Oil and Gas Assessments dropped by 40% from 1986 to 1987, but should remain stable for 1988.

The tables on the following pages display 1987 property valuation and tax information. These statistics are based upon preliminary reports submitted by county auditors and county assessors.

Real property values are unequalized and personal property values include estimates of personal property to be added to the rolls from June 1, 1987 through December 31, 1987

Effective Date: February 6, 1987 (Retrospective operation to January 1, 1987)

SB 191 Sales Tax Increase - Increases the state sales and use tax rate by 1/2% from 4-38/64% to 5-3/32% from April 1, 1987 to December 31, 1989, and 5% thereafter.

Legislative Fiscal Note: With an effective date of July 1, 1987, this bill would increase General Fund revenues by \$26,010,000 in FY 1988.

Amends §59-12-103, Utah Code Ann. 1953
Effective Date: April 1, 1987

1987 Special Session Legislative Changes:

HB 8 Sales and Use Tax Exemption for Steel Manufacturing Facilities - Provided sales tax exemption for certain purchases of materials and equipment by a steel mill which was nonproducing prior to July 1, 1987. The exemption expires on June 30, 1994.

Legislative Fiscal Note: No reduction in FY 88 revenue estimates is necessary if this bill is enacted since no revenues from sales that are exempted by the bill were anticipated at the time revenue estimates were adopted by the legislature. However, approximately \$2,000,000 in sales tax revenue will not be collected in FY 88 if current plans to purchase equipment for the Geneva Steel Manufacturing facility are realized. It is not known what purchases might be anticipated over the life of the exemption nor the number of non-operating facilities which might be purchased.

Amends §59-12-104, Utah Code Ann. 1953
Effective Date: July 1, 1987

SB 11 Sales Tax Exemptions - Long Term Construction Contracts - Provided a refund of the 1/2% state tax increase on April 1, 1987 to persons who had executed written, binding, contracts before March 1, 1987.

Legislative Fiscal Note: The sales tax exemption provided in this bill would reduce FY 88 and FY 89 General Fund revenues by approximately \$1,250,000 - \$2,025,000 each year. Local revenue would be reduced \$240,200 - \$360,300 in each year and transit taxes would be reduced \$66,300 - \$99,400 in each year.

Amends §59-12-105, Utah Code Ann. 1953
Effective Date: April 1, 1987

The Off-highway Vehicle Account of the General Fund is to receive annually the lesser of .3 percent of the motor fuel tax revenues or \$250,000. After appropriations to certain state government departments, the revenue is spread 75% to the State Department of Transportation and 25% to city and county B and C road funds. The aviation fuel tax is distributed 75% to airports and 25% to the Aeronautics Division for improving airport facilities. The estimated amount of tax collected on gasoline used in motorboats is transferred annually from the Transportation Fund to the boating account of the Division of Parks and Recreation for improving boating facilities within the state.

Legislative Changes:

- SB 23 Amendments to Vehicle Weight Restrictions - exempts vehicles moving logs or poles from vehicle size, weight, and load restrictions within certain limits.

Legislative Fiscal Note: This proposed bill will remove weight restrictions for the logging industry and will allow trucks to move logs with the only requirement being 80,000 pounds gross weight. Fiscal impact is unknown due to lack of knowledge as to the number of trucks operating and roads they would be traveling on. The bill reads that the logs will be moved on non-interstate highways from forest to mill. This would indicate that the majority of the travel would be on forest and country roads. There may be some impact due to the modifications necessary when new roads and budgets are constructed.

Amends: §51-5-6, Utah Code Ann. 1953
Effective date: April 27, 1987

- SB 38 Off-Highway Vehicle Registration - Regulates the operation and registration of off-highway vehicles.

Legislative Fiscal Note: The titling provisions of this bill should generate \$25,000 for the Transportation Fund in FY 1988. The additional law enforcement capabilities should generate \$170,000 in additional registrations and fines in FY 1988 and \$235,000 in 1989 for the General Fund Restricted Off-Highway Vehicle Account. Costs to local government for maps and/or signs will be determined by the designations of areas made in those jurisdictions. Most areas will be accommodated by U.S. Forest Service, Bureau of Land Management, and state maps. The helmet requirement may add costs to youth riders but should be offset by reduced medical and disability costs.

- SB 39 Off-Highway Vehicle Operator Training and Funding - Sets out regulations for off-highway vehicle operator training and safety.

Legislative Fiscal Note: It is estimated that the additional fees would generate an additional \$264,000 annually in vehicle registration fees and \$20,000 in class registration fees in FY 1988 for the General Fund Restricted - Recreational Vehicle Account. Class registration fees should increase in the following year (FY 1989) as the training requirements section becomes effective and enforced. First year costs to operate a minimum program should be approximately \$182,900 and fluctuate in succeeding years with demand for Off Highway Vehicle Operator Training.

- SB 63 Motor Vehicle Dealers and Salesmen Amendments - Changes requirements for reporting sales; changes grounds for suspension or revocation of license; adds certain fees; eliminates salesmen bonds; clarifies requirements for salesmen, places of business, temporary permits, franchises and records; makes restrictions on the sale of new motor vehicles to non-franchised dealers and leasing companies; changes special plate expiration date; and creates in-transit permits.

Legislative Fiscal Note: Passage of this bill would allow the Tax Commission to set fees for in-transit permits, loaded demonstration permits, damaged plate replacement, temporary permits, and for additional places of business. The revenues from these fees would be placed in the General Fund. The fees would be subject to public hearings and legislative approval. The \$6.00 fee for temporary permits furnished to motor vehicle dealers, would generate \$350,000. The other fees would generate \$18,000. Passage of this bill only allows for the fees, they do not automatically incur.

Rate of Tax:

Full annual registration fees and highway use fees are proportionally computed according to the applicant's prorated percentage. The prorated percentage is determined as a fraction, the numerator of which is an amount equal to fleet mileage traveled in Utah and the denominator is total miles operated by the fleet in all jurisdictions. The cab card fee for tractors and trailers is \$3.00.

Applicable to:

Any resident or nonresident may proportionally register and license each fleet for operation in this state, where a fleet is one or more commercial vehicles which supply motive power and contain a compartment for the driver. "Fleet" also means not less than ten commercial vehicles which are trailers or semitrailers. Vehicles which exclusively travel in Utah are not included in any application for proportional registration.

NOTE: Unless otherwise specified refer to §59-12-103, Utah Code Ann. 1953.

(STATE SALES AND USE TAX -- continued)

May 8, 1973 - Exempted tangible property or services incorporated or used in the construction of pollution control facilities.

May 13, 1975 - Allowed a sales tax credit for taxpayers who prepay sales tax under the Resource Development Act to finance state-related public improvements.

May 13, 1975 - Deleted exemption for coin-operated laundry and dry cleaning services from subsection (e).

April, 1976 - Exempted sales of "medicine" i.e., prescription drugs. Reexempted sales from coin operated laundry or dry cleaning services.

July 1, 1979 - Phased in exemption of sales of tangible personal property used or consumed primarily and directly in farming operations, specifically denying exemption to equipment, etc. used incidentally on farms. The exemption from sales tax was phased in as follows:

- 1) One percent on July 1, 1979
- 2) Two percent on July 1, 1980
- 3) Three percent on July 1, 1981
- 4) Total exemption on July 1, 1982

July 1, 1980 - Extended sales and use tax exemption for air and water pollution control facilities to January 31, 1985.

May 10, 1981 - Provided for an exemption from sales and use tax on the sale of oxygen and stoma supplies used in medical treatment. •

May 10, 1981 - Defined "motion picture exhibitor" and provided for exemption of sales of "commercials, motion picture films and video tapes by a producer, distributor or studio to a motion picture exhibitor, distributor or commercial television broadcaster."

April 1, 1983 - Provided an exemption from tax for certain items (food, beverages, candy, etc.) sold and dispersed from vending machines when proceeds do not exceed one dollar if the vendor or operator of the vending machine reports an amount equal to 120% of the cost of such items as "goods consumed" on their sales tax return.

May 10, 1983 - §59-12-103, Utah Code Ann. 1953, was amended to exempt from Utah sales and use tax, the sale of "currency and coinage constituting legal tender of the United States or of a foreign nation, all sales of gold, silver, or platinum ingots, bars, medallions, or decorative coins, not constituting legal tender of any nation, with a gold, silver or platinum content of not less than 80%."

The exemption was effected by defining these items as not being tangible personal property. In this way, consumers cannot use a tax-free purchase of these items as a later trade for some taxable purchase.

(STATE SALES AND USE TAX -- continued)

May 10, 1983 - §59-12-104, Utah Code Ann. 1953, was amended to provide for an exemption for the sale of "pre-recorded audio program tapes or records" by a producer, distributor or studio when sold to "commercial radio broadcasters." This bill corrects an apparent oversight of the exemption afforded television stations during the 1981 Legislative Session. Blank (virgin) tapes or records purchased by radio broadcasters for in-house use would not be exempt from tax.

May 10, 1983 - §59-12-104, Utah Code Ann. 1953, provided an exemption for "sales of food, beverages, dairy products, similar confections and related services to commercial airline carriers for in-flight consumption."

May 10, 1983 - §59-12-103, Utah Code Ann. 1953, was amended to qualify and limit the exemption from use tax on items brought into Utah for use by non-residents. The use tax exemption will not apply to property purchased for use in Utah by a non-resident living and working in Utah.

This change was made primarily to prevent non-resident military and construction workers from going out of state (while living and working in Utah) to buy cars and then registering and using them in Utah without paying use tax.

July 1, 1984 - §59-12-104, Utah Code Ann. 1953, was amended to allow a sales and use tax exemption for five years beginning on July 1, 1984 on purchases of materials, equipment, and services used for new construction, expansion, or modernization of any mine, mill reduction works, smelter, refinery (excluding oil and gas), synthetic fuel processing and upgrading plant, rolling mill, coal washing plant or melting facility. July 1, 1986 - §59-12-104, Utah Code Ann. 1953, was amended to allow an exemption from Utah sales or use tax for the purchase of tooling, support equipment, and specific test equipment used or consumed exclusively in the performance of any aerospace or electronic industry contract with the U.S. Government or any subcontract thereunder, provided that title to such items vests at time of purchase to the U.S. Government.

INHERITANCE TAX

Rate or Fee Changes and Effective Dates:

In 1935 the following rate structure was enacted (July 1, 1935):

The tax is:	
If the net taxable estate exceeds \$10,000 but is not over \$25,000	3%
If the net estate exceeds \$25,000 but is not over \$75,000	5%
If the net estate exceeds \$75,000 but is not over \$125,000	8%
If the net estate exceeds \$125,000	10%

Prior to 1943, only debts of the estate were deducted to derive the net taxable estate.

The 1943 amendment provided certain deductions for certain gifts and for the value of property upon which estate taxes were paid 5 years prior to the decedent's death.

In 1947, a \$40,000 exemption included for property inherited by husband, wife or children of the deceased. The exemptions apply to the 3 and 5 percent brackets. Effective date: May 13, 1947.

The 1969 amendment included deductions for an allowance up to \$5,000 for the surviving spouse or children and inserted the \$40,000 exemption in §59-12-7, Utah Code Ann. 1953. Effective date: July 1, 1979.

The 1971 amendment changed the 1935 rates to those listed on the preceding page. Effective date: Where the date of death is July 1, 1971 or later.

The 1973 amendment increased the exemption to \$60,000, where date of death is on or after July 1, 1973. Therefore:

If the taxable estate was not over \$35,000, the tax was 5 percent. If the taxable estate was over \$35,000, but not over \$85,000, the tax was \$1,750 plus 8 percent of the excess over \$35,000. If the taxable estate was over \$85,000, the tax was \$5,750 plus 10 percent of the excess over \$85,000. Deductions from the gross estate were: 1) debts of the estate, 2) property market value received by the decedent upon which estate taxes were paid within five years prior to the decedent's death, 3) all gifts and contributions to the U.S., Utah or other religious, public, charitable, educational, or literary organizations, 4) an exemption of \$60,000.

(INHERITANCE TAX -- continued)

The 1977 amendment changed the base and rate of the inheritance tax by basing it on the credit available for state death taxes against the federal estate tax. This new law applies to all transfers of property in which the decedent died on January 1, 1977, or later.
